The European class newspaper

For many years now, the Lycée Ozanam has a student exchange with the Werdenfels-gymnasium of Garmisch-Partenkirchen in Germany. This year twenty-five students participated in that exchange. A few months after their stay in Germany, they welcomed their exchanges students in Lille from the 30 of April to the 6 of May 2019. Some of these students only study English and Spanish, so they had to use another way to communicate with their new friends. With by example, the Robert Brio, an online dictionary. They were all able to do the activities with the school: quiz, singing some of the national anthems, a visit to Nausicaa and a tour of the city of Lille and of the city of Bruges.

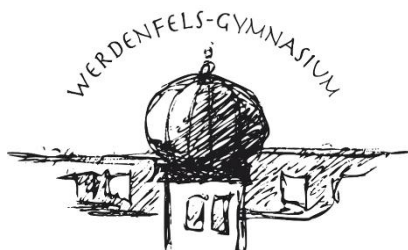

The students also organised their own activities, like a laser game, visit to Paris, sports and fun fairs. The students did those activities ether in groups or alone, but always with

their exchange buddy.

The French pupils who participated in the exchange only talk about an amazing experience, which made them, rediscovered certain things. Like newborn friendships or simple pleasures. They are thankful, of the chance they had to participate in this exchange with such amazing people and such fun activities.

And finally, all of it brought joy, new personal knowledge but also language skills and a lot of curiosity. It was an adventure

from the start for everybody!
